

## Michailidou Iliana

Iliana Michailidou graduated from the Department of Biology at the Aristotle University of Thessaloniki. She completed a Master's degree in Neurosciences in Amsterdam, the Netherlands, and obtained her PhD from the Faculty of Medicine at the University of Amsterdam. She has a strong background in neuropathology, neurodegeneration, neuroimmunology, and preclinical drug testing. She has extensive experience working with post-mortem tissues from donors with Multiple Sclerosis, Alzheimer's disease, and ischemic stroke, as well as with experimental models of neuroinflammatory and neurodegenerative disorders. Her primary research focus is on complement-mediated mechanisms of neurodegeneration. She is currently a research associate at Alzheimer Hellas and the Laboratory of Neurodegenerative Diseases at the Center for Interdisciplinary Research and Innovation (CIRI) of the Aristotle University of Thessaloniki. Her research areas are neuropathology and neuroimmunology of dementia.
